## Crossfield Sports July 1st, 1936.

### Sports Committee of The Board of Trade Arranges for July 1st.

At a meeting of the Sports  
Committee of the Board of  
Trade, held last Friday the Com-  
mittee set under way tentative  
plans for the Annual Sports  
Day July 1st.

The following were elected, each  
convenor to choose his own com-  
mittee and report back at the final  
meeting on June 26th. Each con-  
venor will arrange with his hench-  
men the particular work and activi-  
ties of his own group, using what  
ideas they think best and allocate  
the prizes in a like manner. Those  
interested in any branch of the  
Sports should note the Convenor  
and if particulars are desired they  
will be gladly furnished by those  
in charge.

Parade, R. D. Sutherland  
Gate, F. Stevens  
Midgill Ball, D. J. Hall  
Baseball, G. A. Williams  
Softball, D. J. Hall, L. Rainsbeck  
Athletic Events, R. E. Greene  
Grounds, G. Murdoch, G. E.  
Ainscough  
Shies, H. May  
Concessions, T. Mair.  
Dance, G. Murdoch  
Sports Manager-in-Chief, G. A.  
Williams.

Last year the appeal was made  
by the Village Council and the  
Board of Trade for residents, store-  
keepers, in fact all the people of  
the immediate vicinity to decorate  
the front of the stores or their  
residences with bunting or flags.  
To assist the Bannister Electric  
took orders for those who needed  
decorations of any kind. This year  
the Bannister Electric will again  
look after your requirements for  
flags etc., but your order should be  
placed now, as only special orders  
can be filled, by so doing no carry  
over is necessary.

Help make the Parade route gay  
with bunting, carry a flag or two on  
your cars, and fling dull care aside  
and laugh and enjoy yourself this  
first of July.

Three good games of Senior Ball  
will be played and Softball for the  
Male and Female sexes, races for  
the younger fry and one Midgill  
Ball Game, so come one come all  
and while supporting the Local  
Board, you are also encouraging  
these Gentlemen who have taken  
on the task of running the entire  
Day, whose lot is work, and lots of  
it, enjoyment as a free citizen's for  
July 1, a negative quantity.

A Big Dance will round up the  
day's proceedings, and as in the  
past, the July 1st Dance has always  
been a favourite. Make plans now  
and bring the family, your Uncles,  
Aunts, Cousins, and anyone else's  
relatives that you can find, but  
come, come, COME.

#### 15th Alberta Light Horse

Will those parties who intend  
taking in the summer camp, com-  
mencing June 27th, please get in  
touch with R. D. Sutherland im-  
mediately. Lists are filling up so  
avoid disappointment, by getting  
your name in now.

#### Today's Thought

Those whom nature has en-  
dowed with outstanding talents or  
special ability of any kind have a  
duty to perform in the correct use  
of these gifts, so that the world  
may be the better, brighter, happier  
and more enlightened because of  
their sojourn in it.

—V. May Cottrell.

### Crossfield Mutual Telephone Company Directors Meet

A meeting of the Directors of  
the Crossfield Mutual Telephone  
Company was held Thursday last  
to discuss pertinent affairs.

President F. Laut, and the fol-  
lowing directors were present: Wm.  
Murdoch, Ainscough, J. R. Laut, J.  
H. Havens, and A. Harnock.

Mr. A. Munroe of the A.G.T.  
Calgary was a visiting guest, and  
was introduced to the meeting by  
the President. Addressing the  
meeting, Mr. Munroe gave an out-  
line of the various ways some of  
the Mutual Telephone Companies  
operated under the new system the  
rental charges, and how they varied.  
In conclusion, Mr. Munroe  
complimented the Directorate of  
the Crossfield Mutual Telephone  
Company, for the splendid manner  
and shape their Company was in.

So much was gained from the  
meeting that it was decided to have  
a similar one in the early part of  
August.

### Calgary Stampede In the Offing

In won't be long now before the  
ki-yips of cowboys and war-whoops  
of Indians will be common lan-  
guage around this wild-west town.  
Calgary Stampede time is only a  
couple of weeks away. As usual  
CFAC will be on the spot with  
man and mike. The world famous  
opening Parade on Monday morn-  
ing, July 6th, at 10:00 is slated for  
the big opening gun. It takes two  
hours to describe the passing of  
the kaleidoscope of the last great  
west. It is miles in length and par-  
ades everything from chain-drive  
horseless carriages and ox-carts to  
ultra modern display of rubber  
bathing scanties. A historic re-  
view of the west as she was and is  
and for those that can't join the  
thousands along typical cow-town  
streets, CFAC won't miss an item  
that can be put over a microphone.

### Bishop R. Sherman Officiated at Crossfield

The following received the Lay-  
ing on of Hands, or Confirmed, by  
Bishop Sherman, of Calgary, on  
Friday last:

Mary Francis Dougan, Emily  
Marston, Elizabeth Josephine Short,  
Irene May Walker, Jeanne Patricia  
Casey, Mary Quently Farmer, Vi-  
olet Ellen Currie, Bernard Edward  
Farmer and William Edward  
Connell.

There was a large crowd of  
friends and relatives to witness the  
ceremony.

Mrs. Currie and Mrs. Cartwright  
entertained the Bishop, the newly  
confirmed and their friends at the  
close of the ceremony.

#### The Bubble Bursts.

There have been various rumors  
around about a very cheap fare to  
Vancouver, such as \$7.50, but no  
such fare is contemplated. The  
C.P.R. have, however, contracted  
with three different Societies to  
operate special train service to  
Vancouver as follows:

The Prairie Gladiolus Society—  
Leave Calgary July 5th  
Return limit July 14th.  
Al Azhar Shrine Temple—  
Leave Calgary July 12th  
Return limit July 21st.  
Kinsmen's Club of Calgary—  
Leave Calgary August 2nd  
Return limit August 11th.

For further particulars apply to  
P. F. Fleming, Agent, Crossfield.

#### How About It "BY OBSERVER"

We are reminded when we see  
the bills around town advertising a  
Talkie at East Community Hall,  
that rural Communities demand  
amusement just as much as their  
city friends, the difference being  
that the young people especially  
are being neglected in the rural  
communities. They are more or  
less driven to the cities or larger  
centres where the young people are  
well catered for along these lines.

The lines the writer has in mind,  
are decent picture shows, and the  
sooner the business men of this  
town realize it is to their benefit to  
take more active interest in the  
catering to the citizens of the com-  
munity, by way of wholesome  
amusement, the better the Village  
of Crossfield will be for trading in.

### Alberta Crop Report, No. 3, States That

The outbreak of grasshoppers in  
the south and east-central districts  
is considerably more serious than  
was first anticipated. The ex-  
ceptionally hot weather of a week  
ago caused the hoppers to hatch  
rapidly and crops have been dam-  
aged to some extent in the more  
heavily infested areas. Additional  
supplies are being rushed to pois-  
oned bait mixing stations that have  
now been operating for some time  
at strategic points, and the situation  
is fairly well in hand.

## Lack Of Purchasing Power

One often hears the comment that the prosperity of the cities and towns is dependent upon the prosperity of the farmers, but little is heard of its corollary, namely that the well being of the farmer hinges upon the prosperity of the urban centres, though the one is unquestionably as true as the other.

Possibly the latter has not been heard so frequently in Western Canada as the former because, until very recent times, the farmers' income has been largely derived from an exportable surplus of grain. Under such circumstances the consumer of the bulk of Western Canadian farm products was geographically remote and the fact that the affluence or otherwise of the consumer was of considerable import was but dimly perceived, if recognized at all.

However, this relationship between the Western Canadian producer and the consumer of his products has undergone a change in the past few years and indications are not lacking that the change may be even more accentuated in the next few years.

In the first place, during the past half dozen or so of depression years a substantial percentage of Western Canadian farmers have had little or no income to boast about. Because of a succession of dry years many of them had no crops to sell and others who reaped some wheat or other grains have not received sufficient price to render their work remunerative, partly because of the closing of former markets and partly because of the existence of a big carryover which could not be liquidated, except at tremendous loss.

As a result of their predicament many farmers, even with conditions somewhat more promising, have reduced their acreages reeded to bread grains and are endeavoring to increase their output of other products, including livestock, some of which are finding an outlet to a limited degree in overseas markets and others which, on account of their nature or because of lack of processing facilities, must necessarily be disposed of in local centres.

In the case of those products which are exportable, it is necessary to find new markets or expand existing markets. In the case of products which must be disposed of in local markets, consumption capacity must be increased if the farmer is to be able to dispose of such commodities at a price to yield him a profitable return.

Too frequently, in the past two or three years, farmers have had the experience of hauling or shipping produce to local centres only to find themselves faced with the choice of disposing of them at ruinously low prices or of taking them home again, unsold.

The irony of the situation is that in many cases, perhaps in all of them, the produce would have been welcome in the home of the potential local consumers but, because of conditions which made it necessary for the farmer to raise such produce, these people were unable to buy it, or only at such prices as to render the transaction unprofitable to the producer. In other words, the trouble was lack of purchasing power.

There is no question that local markets are capable of consuming a great deal more local produce if the consumer had the necessary purchasing power and this brings us back to the original statement that the well being of the farmer is dependent upon the prosperity of the urban centres and, so far as Western Canada is concerned, this is much more true than it was a few years ago.

If new local markets can be opened up and the purchasing power of the residents of existing local markets can be increased the problem of the farmer will be at least partially solved.

Fortunately there is every reason to hope that the next few years will see the development of new local markets with the discovery of mineral wealth in the northern areas and this development, a process which is being greatly accelerated at the present time.

This, coupled with an increasing influx of tourists from other provinces and the United States give ground for belief that new markets for local products are in the making. That the latter has real potentialities, at present principally enjoyed by Eastern Canada and British Columbia, is evidenced in the recent publication of statistics showing that more money was spent in Canada by tourists last year than was realized by the sale of Canadian export wheat.

As for the expansion of existing local markets that is, as already stated, largely a question of purchasing power and how this purchasing power is to be increased is a question which is giving rise to a great deal of thought. Can it be done by some overt action or can it only be brought about by the ordinary evolution of economic processes?

One quiet student of affairs, whose name has never appeared in print and perhaps never will, suggested to the writer recently that it could be brought about almost overnight if ten or a dozen of the big industrial leaders of the nation would gather around a table and agree to increase salaries and wages all round. "Merchants," he said, "give much thought to the purchase and display and sale of their commodities, but little or none to the other half of their business—the ability of the consumers to buy."

### No Time For Number

Bylander—"Did you get the number of that car that knocked you down, nader?"

Victim—"No, but the husky who was driving it wore a three-piece tweed suit, lined with Canton crepe, and she had on a periwinkle hat, trimmed with artificial cherries."

Just wishing for things to happen never gets you anywhere.

Natives of southern China raise a great deal of rice, but seldom eat it; while peasants of northern China rarely see rice.

"Of course, my dear, she's still very handsome, but you should have seen her 10 or 15 years ago when she was five years younger."

"When a man carries a luck piece it doesn't work unless he does."

## Maintain National Credit

By Meeting Obligations To The Full Extent Of Capacity

Members of Canadian Manufacturers' Association meeting at Quebec, lent approbation to the suggestion by their president, W. S. Mordey of Toronto, that Canada, by application of "common sense and some old-fashioned methods, should anticipate the coming years with confidence and satisfaction."

The president, in a comprehensive annual review of world economic conditions presented at the annual convention, noted improvement throughout the world generally during the past year.

He was optimistic of the future but with his optimism came a note of warning against too ready spending and loose borrowings by government.

"One feature in connection with the increase of public debt that is giving concern to many individuals and business men," he said, "is the increasing proportion of government obligations that is being acquired by banking institutions. It is, of course, a sound banking theory that when business and industry are depressed and banking funds are abundant, government securities form an ideal investment."

"This theory assumes that when industry and business revive and there is a greater demand on the banks for loans, the government securities can be readily disposed of to the investing public. But it is a necessary implication that the amount of security so held should not be greatly in excess of the capacity of the investing public to absorb. It is also widely felt that if our various governments had to look to insurance, loan and trust companies and private investors as the chief purchasers of their securities the increased difficulty of floating loans would operate as a curb on borrowing."

Mr. Mordey said the aim of Canada should be to maintain national credit "by meeting obligations to the full extent of capacity, refunding old debt at lower rates of interest whenever opportunities occur, and reducing expenses."

Steady improvement in conditions made it appear "reasonable to hope that the world, as a whole, is gradually recovering from the great depression, which culminated the progressive economic and trade disasters that followed and had their origin in, or were at least precipitated by, the dislocation of the war."

## New Type Electric Bulb

Steam Light Latest Development In Modern Illuminating Methods

A cigarette can be lighted in a jet of steam made by a new type of electric light bulb invented in the lamp development department of the Nela Park laboratory of the General Electric Company in East Cleveland, Ohio.

Details of the new development have been made public. The "steam" light is one result of a revolutionary change in structure of electric light bulbs, made by a new art of welding metal to glass.

The steam bulb is about the size of a large house lamp. A jet of steam the size of a lead pencil almost instantly after the light is switched on or a piece of paper held in the jet curls up, smokes and turns to black ash. The steam with this burning power has a temperature of 1,100 degrees Fahrenheit.

### The Only Thing Left

At a court function, we are told, Premier Mussolini stooped and picked up a handkerchief which King Victor Emmanuel of Italy and Ethiopia had dropped, and was profusely thanked by the monarch. Well, his Majesty should be grateful. It's about the only thing left he can pick up, his nose into, states the Windsor Daily Star.

### Prince Rides Bicycle

When a Mongol prince, descendant of a long line of hardriding horsemen, abandons his pony for a bicycle it is news in the frontier settlement of Kweihua, Inner Mongolia. Prince Kiang, a leading Mongol dignitary, shocked his compatriots recently by appearing on the main street of Kweihua on a bicycle.

### Forgot To Forget

One of our newspaper friends says the Windsor Daily Star brings a good story of the absent-minded professor who had suddenly found himself at a dinner which he didn't want to attend. The professor rambled on something like this: "I didn't mean to attend this affair tonight. I meant to forget to come, and I forgot to forget." 2154

## Was Partly Modern

Proclamation Of Coronation Date Broadcast To Empire

With forms and ceremonies inherited from the immemorial past, the date of the coronation of King Edward VIII. was duly proclaimed in London. But modern science and usage intruded even into medieval pageantry.

When the Earl Marshal, Duke of Norfolk, and his attendants stepped out upon the hoary walls of St. James's Palace, there was immediately in front of them a microphone to carry to the ears of the kingdom at large all that was said in the King's name. The proclamation set the date of the coronation as May 12, 1937. The date was announced in a special issue of the London Gazette.

While a fanfare blared from the silver trumpets of the Horse Guards, the Garter Principal King of Arms, with white-gloved hands, unrolled a long scroll nearly a yard wide. In sonorous tones he began his reading. The King's guard of Grenadiers stood at attention, and the great crowd hushed into silence. By means of amplifiers, every sentence was heard distinctly to the farthest limits of the throng. Further away, on the battlemented ivy-clad walls of the palace, stood members of the King's personal household.

Sir Gerald read the proclamation, "Declaring His Majesty's pleasure touching his royal coronation and the solemnity thereof." The reading took nearly 10 minutes. It opened with a reference to "the favour and blessing of almighty God" and spoke of "our princely care for the preservation of the lawful rights and inheritances of our loving subjects."

## Big Prize For Air Race

Race From England To South Africa In September

Sir Alan Cobham announced that I. W. Schleisinger, South African millionaire, has given £10,000 (\$50,000) prize money for the proposed air race from England to South Africa to coincide with the British Empire exhibition at Johannesburg.

Schleisinger is promoting the race with Cobham, himself a pioneer long-distance flyer, as consultant. The Johannesburg exhibition opens Sept. 15 and will run until Jan. 15, 1937. The air race proposal has the approval of the British air ministry and the South African government has promised every assistance.

Entire organization of the race will be undertaken by the Royal Aero Club of Great Britain and participation will be limited to British Empire pilots and aircraft. In this respect it will differ from the London-to-Melbourne race of 1934 which was open to all-comers.

Cobham said Schleisinger's motive in arranging the event was the promotion of commercial aircraft and the furtherance of air interest on the part of citizens of the British Empire. But chiefly, he said, the race was intended to focus attention on the Johannesburg exhibition.

Cobham added the race would show that the day was not far distant when it will be possible to spend a weekend in Johannesburg. Possibly, he predicted, the flight will be accomplished in two days.

## Feather In Your Cap

Phrase Originated From Custom That Is Almost Universal

This phrase means that something is an honor to you. The allusion is to the very general custom in Asia and among the American Indians of adding a feather to the headgear for every enemy slain. The ancient Lydians, and many others had a similar custom, and it is still usual for the English sportsman who kills the first woodcock to pluck out a feather and stick it in his cap. The custom in one form or another seems to be almost universal. In Hungary a fine time some might wear a feather but he who had slain a Turk, and it will be remembered that when Gordon quelled the Tibetan rebellion he was honored by the Chinese government with the "yellow jacket and peacock's feather."

## New Comet Found

Will Be Visible To Naked Eye Late Next Month

The new Pettier Comet, first to be found this year and first to be visible to the unaided eye since 1927, will swing into the range of vision late in July, Harvard College Observatory announced.

Still 120,000,000 miles from the earth, the comet has increased its apparent brightness from ninth to eighth magnitude in four days and by the end of July, before it starts to recede, it will be brighter than sixth magnitude and within 20 million miles.

## To Have and to Hold

Men who are wedded to the practice of "rolling-their-own" honour and cherish Ogden's. They KNOW that Ogden's Fine Cut is a mighty pleasing tobacco, that it's always mild and soothing—the cigarette tobacco "to have and to hold." Now that better times are here, roll-your-owners everywhere are picking Ogden's because Ogden's is better. The package is better, too—because it has the purple easy-opening ribbon for removing the Cellophane. "Chantecler" or "Vogue" papers are the ideal mates for such a grand cigarette tobacco.

# OGDEN'S FINE CUT

P.S.—Your Pipe knows Ogden's Cut Plug.

## SELECTED RECIPES

### SHORTCAKE BISCUITS

4 cups flour  
4 teaspoons Magic Baking Powder  
½ teaspoon salt  
¾ cup shortening (¾ butter, ¼ lard)  
1 tablespoon sugar  
Milk, sufficient to make soft dough, about 2½ cups  
Sift together three times flour, baking powder and salt. Cut in the shortening. Add sugar, mix well. Add milk to make soft dough. Turn on floured board. Pat or roll lightly to 1" thickness. Cut rather larger than ordinary. Bake in oven 250 degrees F. 15 to 20 minutes. When done split and spread with creamed butter. Put between biscuits some crushed and sweetened strawberries. The biscuits may be covered with whipped cream, and the juice from the fruit poured round the dish or served at the table as many people do not like the short cake biscuit soaked with juice.

A Leytonstone, Eng., confectioner constructed a cake model of Westminster Abbey. The model weighed a ton.

She: You think more of that old wireless set than you do of me." He: "Well, I get less interference from it."

You can't fatten a hog by feeding it occasionally, and a prosperous business can't be built up by advertising occasionally.

Medical service by aeroplane has been inaugurated in White Russia.

## Famous Canadian Artist

Homier Watson Dies In His 81st Year At His Home In Ontario

Homier Watson, one of Canada's outstanding artists, died at his home near Kitchener, Ont., in his 81st year. He had been ill for several months.

In the same rural community where he died, Homier Watson was born in 1855 and began his art career without tuition of any kind.

In 1880 the Marquis of Lorne purchased "The Pioneer Mill," exhibited by Watson at the Royal Canadian Academy. This painting and another of Watson's early works, "Last of the Drought," went to the private collection of Queen Victoria. Watson's fame spread and he made several trips to England, exhibiting with the famous artists of his day.

His outstanding contribution to the history of the Great War was his panoramic "Valcartier Camp," done under assignments by the Canadian government in 1914.

A train ferry will soon enable railway passengers to go from London to Paris without leaving the train.

It is estimated that a person has approximately one chance in 3,388 of being killed outright in an automobile accident.

"The women certainly are patronizing barbershops nowadays." "Yes, and it serves some of these talkative barbers right!"

Moscow, Russia, has opened a theatre for the deaf and dumb.

Purity Flour—the very "Flower" of the world's best wheat—is always uniform and dependable—rich in nourishment and flavor—for cakes, pies, flaky pastry and bread. A strong flour that goes farther.

## WIDER MARKETS FOR CANADIAN GOODS IS NEEDED

Quebec.—B. W. Coghlin, of Montreal, as the new president of the Canadian Manufacturers' Association, challenged the C.M.A. to "go and negotiate sound and enduring trade agreements that will benefit all Canada."

"During our history we have made unsatisfactory agreements with other countries but we have also made very good ones," said Mr. Coghlin at the annual dinner at the conclusion of the 48th convention.

"Let us continue our efforts, to negotiate sound and enduring agreements," he said. "Volume of trade alone is not sufficient. The character and value to this country of the exchange of products for those of other countries are vital to prosperity."

"Canada has immense stores of wealth in the form of raw and partly finished materials," said the new president. "But it would not be wise, economically, to export them unless it is done to the permanent advantage of all Canadians."

If industry was to employ more people it should be given every reasonable encouragement, Mr. Coghlin said. If manufacturing operations were curtailed by external influences, unemployment would result.

An appeal for members of the organization to take greater interest in the economic and financial affairs of all western Canada was made by F. C. Brown of Vancouver, newly-elected first vice-president.

The delegates, who previously applauded when one of their speakers suggested all unemployed in Canada should be put to work on a cash basis to relieve the taxation burden, heard from Hon. T. D. Bouchard, Quebec's minister of municipal affairs, how Quebec province plans to do this.

"This plan has no other end in view than to improve the lot of the unemployed on relief, to give a practical use to the millions that have been lost up to now in direct relief, to protect finances of public bodies and to attenuate the crisis by stimulating commerce and industry through creation of useful works," said Mr. Bouchard.

## C.P.R. To Build Road

Given Right To Build Branch Line In Quebec

Quebec.—By a vote of 23 to 4 the railway committee of the Quebec legislature gave the Canadian Pacific Railway the right to build a line from Angliers, in L'Acadie county, to Bennetville, in Abitibi county, via Noranda.

The company, by its bill, first requested permission to build as far as Lake Chibougamau. The committee decided it could build the line from Angliers to Noranda.

## Will Hear Pension Claims

Acting Chairman Of Canadian Commission Goes To England

Ottawa.—Justice Fawcett G. Taylor, acting chairman of the Canadian pension commission, has sailed from Montreal for England. Judge Taylor will hear claims for pension of former members of the Canadian forces now resident in the United Kingdom. At the conclusion of his sittings Judge Taylor will proceed to France to be present at the unveiling of Canada's national memorial on Vimy Ridge.

## Must Have Certificates

Edmonton.—Certificates of proficiency for Alberta workers in certain designated trades became a requirement under provincial law with publication in the Alberta Gazette of the Tradesmen's Qualification Act passed at the last session of the legislature.

## Carlton Trade With Germany

Washington.—German-American trade, already at a record low figure, was further restricted when the United States suddenly imposed additional duties on 10 articles imported from the Nazi state, effective July 13.

## Mark Late King's Birthday

Ottawa.—The anniversary of the birth of the late King George V. was marked in this capital by the beating of "Retreat" by massed bugle and brass bands of the Ottawa garrison. This was followed by a concert.

## Loyal To Empire

Propaganda Favoring Peace At Any Price Decried By I.O.D.E.

Winnipeg.—Propaganda favoring peace at any cost, "the effect of which would be the severance of ties which bind Canada to the empire," is decried in a resolution endorsed by the National chapter, Imperial Order Daughters of the Empire, in annual session here.

The resolution reaffirms loyalty to the empire, pledges support and accepts all responsibilities of empire ties.

The resolution contends "there is being fostered in the Dominion a propaganda, the avowed purpose of which is the avoidance of war at any cost, but the ultimate and inescapable effect of which would be the severance of the ties which bind Canada to the empire."

"It has become apparent that the efforts of the English-speaking people of the world to substitute collective security for individual national armed effort in the adjustment of international differences are not being subscribed to by the other nations of the world."

"And because of this fact, it now becomes apparent that those peoples of the world who desire peace and international justice must be prepared to defend those principles by whatever united action becomes necessary."

The resolution reiterates the order's desire that peace be maintained "by every honorable means," but "does hereby accept those national responsibilities which accompany the benefits accruing to Canada from its association within the British Commonwealth of nations, and we do, therefore, now reaffirm our loyalty and pledge our support to the empire."

## Use Waste Gas

System To Utilize Gases In Western Canada Now Permitted To Blow Off

Quebec.—Negotiations are now under way to permit the gas that is at present permitted to blow off from Western Canadian oil fields, Major General A. G. L. McNaughton, president of the National Research Council, told Canadian Manufacturers' Association in annual convention here.

"We have developed a system," said the president, for manufacturing these gases into carbon black, such as used in the manufacture of motor tires."

He was not prepared to say to what extent the new system would be developed but he expressed the hope it would be able to provide Canada with its own carbon black, of which approximately \$1,000,000 worth was imported in the last year.

## Storm Halts Expedition

Latest Attempt To Scale Mount Everest Seems Hopeless

Darjeeling, India.—The latest expedition attempting to scale Mount Everest, never conquered by man, was feared doomed to failure when the Alpine observatory reported a strong monsoon raging in the Everest region with no prospects for improvement.

The outlook for the British expedition, led by Hugh Rutledge, is now considered hopeless. It has been dogged by impossible weather conditions from the start.

The party was forced back from its first base camp several weeks ago by intense cold and a storm and later was delayed by another monsoon.

Nine men have lost their lives in four attempts to scale Everest, which is 29,141 feet high.

## Harmonics For Oil

Newark, N.J.—Forty musical harmonicas have been acquired by the Standard Oil Company of New Jersey in payment for shipments of oil to Germany. Walter C. Teagle, president, revealed at the annual stockholders' meeting. This deal was necessitated, he said, because of the German government's prohibition on the exportation of currency.

## May Receive Pension

Ottawa.—The federal government is giving "most serious consideration" to granting a pension to the family of John Lewis, Barnia, Ont., policeman killed by "Red" Ryan in a liquor store holdup recently. Hon. Ernest Lapointe, minister of justice, told the House of Commons.

## Search For Clues

Seattle.—A Smithsonian Institution expedition sailed for Alaska in search of clues to the origin of the Eskimo and the North American Indian.

## Lend Aid To Science

Advance Arguments In Favor Of Scientific Research

Quebec.—Canadian manufacturers were urged to lend every aid to development of scientific research and to derive the greatest benefit from its latest disclosures.

Benefits to be derived from this course were outlined to the annual convention of Canadian Manufacturers' Association by L. A. McNaughton, executive engineer in charge of General Electric Research Laboratories at Schenectady, N.Y., and Major-General A. G. L. McNaughton, president of the national research council at Ottawa.

Mr. Hawkins, who described research work as essential to an industry as a cost accounting system, said: "If we could produce more and more and work less and less, there is no reason why life should not be better than that enjoyed by the people of old Athens who each had at least four slaves."

## BATES RETURNS MONEY HE MADE ON INSURANCE

London.—Alfred Bates, advertising executive, and one of three men held guilty by the tribunal which investigated the budget leak, has returned his winnings to the insurance brokers.

Bates had claimed the money in connection with insurances he placed against increased taxes in the budget brought down last April.

Harold Eves, Bates' solicitor and secretary, said a letter had been written to all brokers through whom insurance had been placed informing them although Bates "adheres to the evidence given by him before the budget inquiry tribunal, in view of the report of the tribunal published he does not desire to make a profit out of insurances placed by him."

Bates, in testifying before the tribunal, had sworn he had received no advance information on the budget. His insurances were a result of his judgment that increased armament expenditures would make an income tax increase inevitable, he testified. In its report, the commission charged Bates with "misstating and suppressing the truth."

Meanwhile, the central figure in the inquiry, J. H. Thomas, sought seclusion in the country. The former colonial secretary, who resigned during the investigation, must make a decision whether to resign his Derby seat in the House of Commons.

The third man mentioned unfavorably in the report, Sir Alfred Butt, must also consider his position in respect to his seat in the House of Commons. The report held he and Bates used information they obtained from Thomas to insure themselves against increases in tea and income taxes, later announced in the budget.

## Bounty For Timber Wolves

Alberta Now Paying Five Dollars Under New Regulations

Edmonton.—Amended regulations published in the Alberta Gazette provide a \$5 bounty for timber wolves. Bounty for coyotes in the Cypress Hills forest reserve is set at \$2. Cougars killed in April and May are bringing \$10, and \$20 after June 1.

In addition, pelts are to be sold by the government, and the proceeds, less commission, to be handed to the captors, along with the bounties. Big game licenses for Alberta hunters are advanced from \$1 to \$2.

## RE-ELECTED CANADIAN LEAGUE SOCIETY HEADS

Sir Robert Falconer, former president of the University of Toronto (left) and John W. Dufos (right), editor of the Winnipeg Free Press, who were re-elected President and Vice-President, respectively, of the League of Nations Society in Canada, at the convention in Ottawa.

## ADMIRAL SIR DUDLEY POUND

Commander-in-chief of the British Fleet in the Mediterranean, who flew to Jerusalem to confer with Sir Arthur Wauchop, British High Commissioner for Palestine, on the present serious situation in Palestine.

## Unfit For Duty

Hon. R. B. Bennett Says Many Judges Should Be Retired

Ottawa.—Many Canadian judges are physically and mentally unfit to give continuous and concentrated attention to their duties, Hon. R. B. Bennett, Conservative leader, told the House of Commons.

The former prime minister, honorary president of the Canadian Bar Association and a leading lawyer of the west in his earlier days, said there were judges on the high court benches of every province who would retire on pension although incapacitated to carry on their work.

The house was considering a bill to place federal approval on changes in the Ontario high court made by the province. They involved two new trial judges and the retirement eventually of the chief justice in appeal.

The Conservative leader referred to men in the prisoners' dock, giving their evidence and judges so deaf they could not hear. That, he said, "is a condition that exists at this time in more than one province."

At the same time, Mr. Bennett gave his opinion. Canadian judges were underpaid, Hon. C. H. Cahan, former secretary of state in the Bennett administration, did not agree with his party chief. The trouble was "lack of moral courage" on the part of successive ministers of justice who could retire provincial high court judges who were incapable of performing their duties.

## Bond Issue Quickly Sold

Offering Oversubscribed And Bonds Closed In Half Day

Ottawa.—Subscription books for the new issue of 30-year 3½ per cent. Dominion government bonds which were opened June 3, were closed the same day at noon, Eastern Daylight Time, with the offering heavily oversubscribed. The issue was limited to \$20,000,000 and, selling at 99, will yield approximately 3.30 per cent.

Books for conversions were opened at the same time and will remain open at the discretion of Finance Minister Dunning. The convertible bonds are \$45,000,000 at 1½ per cent. due September 15, \$63,000,000 at 2 per cent. due October 15, and \$79,000,000 at 3 per cent. due November 15.

## To Amend Vote

Ottawa.—The House of Commons gave first reading to a bill to amend the Franchise Act, introduced by Hon. Fernand Dufresne, secretary of state. It provides for the appointment of enumerators and the compilation of voters' lists for by-elections.

## Stamps Out Evil

Postmaster-General Commended For Putting Stop To Dismissals

Edmonton.—Postmaster-General Elliott should be lauded "for his effort to stamp out the evil" of wholesale dismissals of postmasters, Mr. Morgan of Didsbury, Alta., president of the Canadian Postmasters' Association, declared.

In an address to the Alberta branch of the association, of which he is also provincial president, Mr. Morgan said few postmasters had been dismissed since the present federal government took office. He charged that "500 postmasters were let out by his (Mr. Elliott's) predecessor" and that only 50 have been dismissed under Mr. Elliott.

C. D. Griffith, Estevan, Sask., Dominion secretary, said Mr. Elliott had informed him that members of parliament in the past had conveyed whole lists of postmasters they wanted discharged.

In discussing general problems of postmasters, President Morgan advised against "tactless" handling of "difficult" members of communities.

## Rejects Age Limit Bill

Minister Of Justice Will Not Change Juvenile Delinquents' Act

Ottawa.—Hon. Ernest Lapointe, justice minister, turned down in the House of Commons, the Church bill to extend the age limit of the juvenile delinquents act from 16 to 19.

T. L. Church (Cons., Toronto, Broadway) sponsor of the bill, said the change was designed to acquaint parents with their children who were in trouble with the police. They now are acquainted about a child 16 or under.

## WOULD DEVELOP GREATER TRADE WITHIN EMPIRE

Quebec.—Canada's sister dominions were pictured as the ground on which she might develop her export trade.

The suggestion was made to delegates to the 65th annual convention of Canadian Manufacturers' Association by representatives of Australia, New Zealand, South Africa and the British West Indies.

Possibilities of empire trade development also were reviewed by F. W. Field, senior trade commissioner for the United Kingdom in Canada and Newfoundland.

From the delegates themselves came advocacy for increased production, increased sales and increased exports. But from Hon. W. D. Euler, Canadian minister of trade and commerce, came a warning against heavy production when it became a matter of production below costs.

The minister spoke optimistically of conditions in Canada generally, and he urged his listeners to take every advantage offered in foreign markets. He sympathized with manufacturers in certain problems but he blamed them for provoking some of their own difficulties. They were not taking full advantage, for instance, of foreign trade possibilities.

The minister conceded in some cases difficulties were due to "perhaps a force of circumstances," but he declared there "can be little justification for continuing production without profit."

In Canada, he continued, there were too many boot and shoe industries, too many newspaper mills and too many furniture factories. In most cases, production was being made below costs.

"I am not advocating any combine," said Mr. Euler, "but let them get together on this. Let them exercise some co-operation between themselves and show some consideration for each other."

Delegates applauded the suggestion by E. J. Freyseng of Toronto that "the sooner the government puts the unemployed to work and pays them cash, the sooner we will be relieved of our problem of taxation."

The trade commissioners, L. R. Macgregor of Australia, J. W. Collins of New Zealand, D. De Wel Meyer of South Africa, and C. Rex Stollmeyer, of the British West Indies, all urged development of trade with their countries.

They spoke optimistically of future trade relations, which they said were steadily improving, and urged Canadian manufacturers to visit their respective dominions for development of trade both ways.

## LEAGUE STRESSES VITAL PROBLEM OF UNEMPLOYMENT

Geneva.—The International Labor conference opened its sessions here by electing C. W. Gramscini of Denmark as president. Delegates of 48 countries, including Canada, were present.

Dr. W. A. Riddell, the Dominion's adviser to the League of Nations at Geneva, and chairman of the governing body, hailed the conference as "an opportunity to create in the whole world a sound public opinion in regard to the vital problem" of labor and economics.

Dr. Riddell delivered the opening address to the 153 delegates and 236 technical experts. Italy was not represented, her delegates having been withdrawn from Geneva on instructions from Rome.

The Canadian, dean of the diplomatic corps in Geneva, stressed the importance of the report prepared by H. B. Butler, British economist and a director of the I.O.O.

The report draws a comprehensive picture of the present international crisis and deals particularly with unemployment. Butler set forth the unemployment problem could only be solved through better organization of the world's economic life.

The International Labor office, said Dr. Riddell, is "one of the most important, if not the most important forum, for discussion of problems fundamental to human wellbeing."

## Memorial To King George

Premier Baldwin Urges Erection Of Permanent Memorial To Late Sovereign

London.—Prime Minister Baldwin, speaking in the House of Commons on the birthday of the late King George, appealed for the erection of a permanent memorial to the late sovereign.

He asked the "members of one great family to resolve that, long after our voices are still, there shall be some permanent memorial to King George for the service and happiness of future generations—a visible sign of the love of the king's people."

The prime minister commended the two schemes adopted by the committee of the lord mayor of London. The proposed statue between Westminster Abbey and the houses of parliament, Mr. Baldwin said, would be "as beautiful a spot as any in the world when the scheme is completed and a sacred spot for every member of our own great family and also for visitors from America and all over the world."

The second proposal for the construction of children's playing fields throughout the country, "for which there is an increasing need," was praised by the prime minister. "Land owners can give land. The rich can give wealth," he said, "but I want to see a real offering of the people, a complete realization of all classes of the country, possibly of the empire, that we are all members of one family."

## Troops Sent To Palestine

Detachments From British Regiments Have Arrived From Egypt

Jerusalem.—Detachments from the Bedfordshire and Hertfordshire regiments arrived in the Holy Land from Egypt to reinforce the 7,000 British troops already here. Five Jews have been killed during the last 24 hours.

The government, moving to outlaw the Arab strike movement, authorized district commissioners to order the reopening of all businesses closed during the strike under pain of heavy penalties.

## Says Insurance Rates High

Edmonton.—Fire insurance rates in Western Canada were 30 to 60 per cent. higher than in the east, John Huggard of Winnipeg, charged here in an address at the convention of the Alberta branch of the Canadian Postmasters' Association. He outlined a plan already under way toward formation of a fire insurance company among postmasters to give postmasters a lower premium rate.

## Highway Construction Program

St. Paul, Alta.—Employment would be given to 40,000 men when the Alberta government starts its certificate plan in the highway construction program, J. W. Beaudry, Social Credit M.L.A. for Beaver River, stated at a meeting of the St. Paul board of trade. He expected the certificate plan would be put into operation soon.

**Between Ourselves**

July First again draws closer, and with it the Annual Sports Day of the District.

Last year's showing brought a deficit, and yet on many sides we hear the complaint, the admission price is too high.

Lets view this feature in detail, and we find that to maintain the high Standard of Sports as in 1935, it is necessary to have a gate of at least 600 adults, at 50 cents each to help pay expenses. If the day at present goes through as planned, a detailed list of the expenses reads as follows:

Approximate cost of Band	\$35.00
Parade Prizes	25.00
Base Ball	150.00
Midget Ball	10.00
Softball, Ladies and Gents	30.00
Athletic Events	35.00
Sundry Expenses	35.00
	\$320.00

Faced with these figures, we feel sure that the residents of the Community will view the Sports Day in a different light, and admit that the price of admission is not too high.

Then again it is the case that a mediocre day is all that is desired, nothing to attract outside towns, then lets have a twenty-five cent day, cutting down the Ball prizes to say, fifty dollars, no Parade, no Band, and the Committee will about break even. But don't overlook this feature, once you reduce the standard of your Sports Day, you will never again get the outside support, as Crossfield will have the name of putting on just another Sports Day.

The local Board has done much to help the Community, taking into one thing into consideration, let alone the many others, is not the Park with its many swings, twirlers, slides and junior ball diamond, a credit to the Board, and yet to help swell the scanty treasury they are met on all sides with the cry, Sports Day costs too much.

As we close, lets look at the other side of the picture, Sports Day without the colour of a Parade, without the snappy swinging tunes of the Band, is like a ship without its colours, unfinished, and yet to pay these two items, it takes the first 120 people through the turnstiles.

Don't overlook this feature, also, folks, 90 percent of the prize money won, is spent right here in our Village and Community, and while it costs you grown ups fifty cents each think of the youngsters that get in for nothing and enjoy a real day. Why? Because you make it possible by paying the admission price.

## S. O. S.

Once again we appeal to those of our Subscribers who are in arrears to bring their subscriptions up to date right away. If each person was to pay even one dollar on account this would see us through the summer months.

The Grocer, Butcher etc. need our money but unless we are paid how can we PAY.

Won't YOU do your bit and save us from going under.

## Ether Waves

By Omar

*Once will be glad to answer your Radio Questions. Address him in care of the Chronicle.*

## Radio Interference

The ordinary house supply of electric power for light and other uses is of very low frequency (60 cycles per second) compared with that used in radio transmission (broadcasting 50,000 to 1,500,000 cycles) and the radio set does not respond to this low-frequency radiation. However, disturbances of radio frequency may be set up on such systems by turning on and off switches, by the sparking of poor contacts and loose connections or by sparking at the brushes of motors. Although the amount of high-frequency noise thus produced on the power supply lines may be small compared with the radio signal produced at a radio station, nevertheless the proximity of this interference source to the radio receiver may make its effect comparable with that of the radio station programme being received.

The intensity of the radiation from a radio station diminishes rapidly as we move away from the station. Thus a given local radio-interference noise strength may cause bad interference when a distant station is tuned in and may cause no difficulty whatever when a nearby powerful radio station is received.

Obviously there are two ways to restore the balance in this case. One would be to reduce the radio noise in the local power circuit. The other would be to increase the amount of power sent out by the broadcasting station. Both of these methods have their advantages and disadvantages. There has, however, been a gradual increase in the power level of broadcasting stations. A few years ago 1 to 5 kilowatts was common; however, at the present time there are a large number of stations using 50 kilowatts and one station is operating at 500 kilowatts. These successive rises in the power used by the broadcasting station have permitted good radio reception over much wider areas than heretofore.

## Occasional Notes

**the Study Window**  
By Rev. A. D. Currie

It is a wise man who listens to all critical and unkind remarks and tries to see what truth lies in them. Such a man will pluck a blessing out of a most unseemly package. When we do not answer back or try to retaliate it is a good witness to the practicability of the Christian standard. There was one thing that Christ never did and that was to try to Justify Himself. Anyone who tries to justify himself, and there are many temptations to do so, falls from Our Saviour's high standard.

## Mr. Lady

**Cottage Cheese and Pineapple Salad**

Place on lettuce leaf one tablespoonful of cottage cheese, which has been mixed with sweet cream, pepper and salt, and on top of cheese place one slice of pineapple or two tablespoonfuls of crushed pineapple, top off with either whipped cream or mayonnaise dressing. Can be garnished with a bit of grated cheese. Makes a nice substitute for meat as a luncheon or supper dish.

## Pop Overs

Two cups flour  
Two eggs  
Two cups sweet milk  
Butter, size of an egg  
A little salt.  
Beat thoroughly. Bake in gem pans in hot oven.

To make a starch which will not stick, stir a pinch of borax into boiling water and add it to the starch, with a few drops of blueing.

If clothespins are boiled in a salt brine they will become toughened and will prevent their sticking to the clothes in frosty weather.

## Motor Highways Make Accessible Points of Interest In Canada's National Parks

Close to 700 miles of motor highways and secondary roads make accessible points of interest and beauty in Canada's National Parks, and each year this system of park highways is being extended to new areas of scenic grandeur. Realizing that to attract an ever-increasing flow of motor tourists to the National Parks safe, easy riding roads must be provided, the Department of the Interior has gradually increased the mileage of National Park highways so that today major points of interest are now easily reached and the work of further extending the system goes forward.

Of special interest to motorists visiting Waterton Lakes National Park, Alberta—the Canadian section of the Waterton-Glacier International Peace Park—will be the new approach known as the Kennedy Creek-Belly River cut-off. This new highway will be open for traffic during this summer and will furnish a direct connection between Glacier National Park in Montana and Waterton Lakes National Park in Alberta. From the south the new road leaves United States Highway No. 87 only a few miles north of Babb in Montana and runs in a northwesterly direction through the northeastern corner of Glacier Park to cross the international border into the Canadian section of the park.

During the past few seasons considerable progress has been made on the Lake Louise-Jasper Highway. This road will link Jasper National Park, Alberta, with the parks in the "Three-Park Unit" comprising Banff, Kootenay, and Yoho National Parks, and offers motorists a scenic tour of unrivaled mountain beauty. Construction on the Jasper end totals a little more than 50 miles, while the road extends northward from Lake Louise for a distance of about 30 miles. When the remaining gap of about 60 miles has been completed the whole route promises to be one of the most spectacular on the continent from a scenic point of view, traversing as it does the great intermontane trench of the Canadian Rockies which lies east of the continental divide. Throughout its entire length the motorist will behold many awe-inspiring and magnificent views of the lofty peaks and glaciers for which the area is particularly noted.

A motor trip through the great National Parks of the Canadian Rockies offers splendid opportunities to become acquainted with nature in her most magnificent setting. It would be difficult indeed to find more charming and majestic scenery than that in these mountain parks. Motorists who visit the National Parks of the Rockies for the first time are agreeably surprised at the extent and excellence of the dustless and well-guarded standard highways, all of which are kept in the best of condition during the touring season. In selecting the route for a new highway the needs of the tourist and general motorist have been considered so as to ensure easy gradients, safety, and awe-inspiring views.

With the exception of Glacier National Park on the summit of the Selkirk range in southeastern British Columbia, reached only by rail, all National Parks in Western Canada are accessible by motor car.

Accommodation in the National Parks of the Canadian Rockies may be had at a number of hotels—ranging from the modest-priced to the most luxurious—rooming and boarding houses, bungalow camps, cabins, and motor camps. Special attention is given to the comfort of campers and cottagers in order that afterwards their visit may be not only a delightful holiday memory but a source of renewed vitality. Visitors are assured of courteous and hospitable treatment wherever they choose to stay.

**Mine Of Information**  
A Manitoba member states that \$5,000 to \$6,000 is being spent by the agricultural committee in getting information that anyone could secure by consulting the Canada Year Book. That admirably compiled volume says the Edmonton Journal is not made use of to the extent that it deserves either at Ottawa or elsewhere in the Dominion.

France has only 391 persons with annual incomes of \$60,000 or more, as compared to 850 persons with such incomes three years ago.

Mexico, the United States, and Canada, in the order named, lead the world in production of silver.

### The Grading Of Beef

Brand Is Guarantee It Has Been Government Inspected

Apart from high quality and value for money, one of the reasons why graded beef is now selling in Canada at the rate of well over 3,000,000 pounds a month is the convenience of purchase afforded to the housewife. It is no longer necessary to pay a personal visit to the store for the purpose of selecting beef. It is necessary only to telephone for the desired cut of blue brand or red brand of beef as desired. The portion of the Government brandmark which appears in ribbon-like form upon each cut when it is delivered is the purchaser's safeguard and protection. The coloring materials used in branding are not injurious and consequently from a health point of view need not be removed before cooking.

Only beef which has passed inspection for health by officers of the Dominion Department of Agriculture may be graded. The Blue Brand (Good grade) carries the moderate amount of fat necessary to protect it in handling and cooking, and to render it tender and juicy and of good flavor. This grade is in demand with those who desire good eating quality without undue waste. The Red Brand (Choice grade) carries a little more fat, or finish, and appeals to those who desire the very highest quality obtainable and to whom price is not the most important consideration. In any case the ribbon mark, Red or Blue, is the purchaser's guarantee of quality.

### Dominion Cerealist

Leonard H. Newman To Receive Honorary Degree Of Doctor Of Science

The honorary degree of Doctor of Science is to be conferred on Leonard H. Newman, the Dominion Cerealist, by the University of New Brunswick. In accordance with the official announcement by the Senate of that University, the ceremony will take place at a special convocation to be held in Fredericton, in July at the time of the meeting of the Canadian Society of Technical Agriculturists, of which Mr. Newman was formerly president.

Mr. Newman is known throughout Canada for his work in developing new varieties of wheat and other grains. He is a graduate of Ontario Agricultural College, and took special studies at the Iowa State College; at Cambridge University, England; and in Sweden. From 1905 to 1923 he was secretary of the Canadian Seed Growers' Association. Since 1923 he has been Dominion Cerealist which entails the active supervision of the cereal breeding program of all the Experimental Farms of the Dominion Department of Agriculture.

### Need Dry Storage Place

Onions Keep Best In Open Crates Of Lath

Most people make a mistake in storing onions. They need to be kept dry instead of damp, and consequently an airy place is best for them, though for the same reason on foggy days all windows should be kept closed.

Open crates of lath, such as are used to ship potatoes, are good receptacles, as they afford ventilation and keep the onion from lying in a deep mass. When they are piled together they are liable to sweat, grow and induce rot.

### Gave Perfect Service

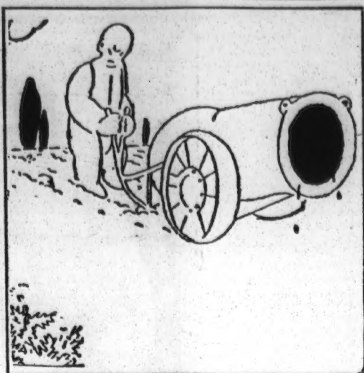

Page In New York Hotel Carried Out Orders

A foreign lecturer who stopped overnight in New York, at the Princeton Club, reports that he left a call for half-past eight the next morning, but was so wakeful that he was up at eight, and went to the washroom to shave. A page boy sought him out there one time later, and asked if he was the occupant of Room 95. The gentleman said he was. The page then drew himself up smartly and said, "It is time to get up, sir."—The New Yorker.

Minister—"I haven't seen you at the church lately."

Sandy—"Dinna worry about that, sir. You havena lost my custom. I dinna go anywhare else."

Use of wood gas for vehicles is being urged in France.

The new Plough—invented by civilization.

### War On Wolves

Aeroplanes To Be Used To Hunt Down Packs In Alaska

Plans for an aeroplane attack on savage packs of Alaskan wolves were worked out by three United States government agencies.

Explaining "because of the vast open spaces in northern Alaska it is difficult to approach packs of wolves unobtrusively and kill them by shooting," officials said they planned also to ask the help of reindeer herders in trapping them.

The expenses of an experienced trapper will be paid jointly by the biological survey and the reindeer service. The office of Indian affairs is supplying traps and other equipment. The trapper will travel by aeroplane.

As an example of the wolves' activities, officials said more than 100 reindeer of Barter Island were killed despite patrols carrying lanterns.

Emphasizing the seriousness of the situation, Indian office officials said many Eskimos were without food except for that provided by the government.

### Building Plans

British Government Speeding Up Plans For Production

The British government, laying plans for a speeding up of military plane production, concluded agreements with two large motor companies for new factories to build framework planes.

The agreements were made with the Austin and Rover concerns.

Sir Thomas W. H. Inskip, the defence co-ordinating minister, announcing contracts in commons, said: "The project for the new factories is immense; one of the best brains of the country designed it."

The prodigal son had returned. "Father," he inquired, "are you going to kill the fatted calf?"

"No," answered the old man, looking the youth over carefully. "No, I'll let it live. But I'll put you to work and train a lot of that fat off."

Synthetic butter has been patented, a chemist points out, but dairy interests hold the patent to safeguard the natural product.

### A Lacy Sailor That Dips Or Rolls

If you're Fashion smart this season, and intrigued by a bit of easy crochet, you'll find smartness "go to your head" in the form of a lacy "sailor" hat. Quickly crocheted in string, the same lacy stitch is used throughout to make the version that dips so alluringly, and the one that rolls so perky "off face." Directions for crocheting the flowers—and how necessary they are to the smart woman this season—are included.

In pattern 5647 you will find complete instructions for making the hat in both ways and the flowers; an illustration of them, and of all the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## Wild Plant Study Leads To Discoveries Proving Of Economic Value

### Value Of Milk

Is An Excellent Food For Those Who Are Underweight

A study of milk consumption recently conducted in a metropolitan centre on this continent reveals the fact that diversity of opinion exists regarding the "fattening" qualities of milk. Of the two thousand adults interviewed, sixty-one per cent. of whom were women and thirty-nine per cent. men, over two-thirds expressed the belief that milk is a fattening food, and the remainder, that it helped to reduce weight. In both cases the percentage was about the same for milk drinkers and non-milk drinkers.

It may seem strange to say that both opinions are correct, but such is the case. When milk is taken, either at or between meals, in addition to the amount of foods which keeps an individual at constant weight, it is natural that it will have a tendency to increase weight. On the other hand, because milk has a low caloric value compared with many foods, it is an important factor in the diet for reducing abnormal weight. The first requisite in every diet, whether it be one for reducing, increasing or maintaining normal weight, is the inclusion of foods which will furnish basic building and regulating material. Milk supplies more nutrients to the body than any other single food and should be given a prominent place in meals planned to "safely" reduce body weight. For the same reason milk is an excellent food for those underweight to gain generously, since it adds not only calories, but essential minerals and vitamins to the diet. It is easier to use extra amounts of milk than most other foods, as it can replace beverages lacking in nutritive value, not one calorie, but essential minerals and vitamins to the diet. It is easier to use extra amounts of milk than most other foods, as it can replace beverages lacking in nutritive value, not one calorie, but essential minerals and vitamins to the diet. It is easier to use extra amounts of milk than most other foods, as it can replace beverages lacking in nutritive value, not one calorie, but essential minerals and vitamins to the diet.

### No Ice In Iceland

Hardly Enough Even In Winter To Skate On

Arni Jonsson, Iceland journalist, landed in New York to give the following explanations of his country and countrymen:

1. There is practically no ice in Iceland, even in winter.

2. Icelanders are the tallest of races because they eat mainly fish. Mr. Jonsson came to America aboard the Iceland steamer Katla, which, according to the cargo agents, was the first ship flying the Icelandic flag to dock in New York since 1923.

The vessel, of 1209 gross tonnage, left the capital of Iceland, Reykjavik, April 17, with a cargo of 900 tons of salt fish consigned to Gloucester, Mass., New York, and Cuba. "Now," said Mr. Jonsson, "among other things, we should like to correct for one and for all the widespread belief that Iceland, because of its name, is eternally covered with ice. That is not so. In fact, Reykjavik, the largest city with 35,000 inhabitants, hardly ever has a speck of ice. During the winter we have to drive miles into the country to find enough ice and snow to ski and skate on."

### Very Dependable

"My gosh, Bill," groaned the managing editor of the tabloid, "nothing scandalous has happened in four hours. What'll we do for the front page?"

"Aw, don't get discouraged, Steve," the city editor comforted. "Something will happen. I've still got faith in human nature."

### Longest Lightning Rod

Los Angeles now boasts of the longest "lightning rod" in the world. It consists of wires above and below the steel towers of the Boulder Dam power transmission line terminating there and is expected to carry off strokes of lightning over a distance of 250 miles.

Fishes that live near the surface of the water have large eyes, while those that live deep have small and weak eyes.

Milk cows are generally used for plowing in Freiburg, Germany, gateway to the Black Forest of Germany.

During his lifetime, the average man shaves 20 square miles of face.

American women use a total of 2,375 tons of rouge every year.

It is well known that some plants are of economic value as food, drugs, fibre and oil-yielding, and that others are noxious or poisonous; but the numerous inquiries received each year by the Division of Botany, Central Experimental Farm, Ottawa, show that many people do not know in which category certain of our wild plants should be placed. Some of the correspondents now enjoy palatable healthgiving dishes of native fruits that they previously shunned as poisonous, while others have been warned against harmful and in some cases, deadly poisonous fruits which they thought to be edible. Plants have been identified that have caused, or may have caused serious illness, or even the death of human beings as well as of livestock, and all persons would be well advised to obtain reliable information before sampling wild fruits or vegetation of any kind about which they have any doubt.

To facilitate this important work of identifying plants, the Division of Botany maintains an extensive collection of native Canadian plants which are carefully preserved and which form the "Herbarium," well known to botanists and to all who are interested in the wild plant life of Canada. This collection contains some fifteen thousand mounted specimens, most of which were collected by members of the botanical staff during their field work over a period of many years, while others were taken in the many hundreds of specimens sent in year by year for identification from all parts of the Dominion.

The collection is readily accessible not only to members of the staff but also to the public for reference and for the comparison of plant specimens, and small herbaria have been established in many institutions.

Although inquiries concerning the edibility of wild fruits are so numerous, they form but a small part of the requests received by the staff of the herbarium. Information regarding noxious weeds is continually in demand. These weeds appear in new localities each year. This fact is clearly shown by the valuable weed survey conducted by the Division of Botany, which is also responsible for many additions to the herbarium each year.

The identification of grasses also forms a large part of the work of the herbarium. As is well known, grasses are one of the most important groups of plants, as they enter so much into livestock food value, and in the formation and upkeep of lawns. Some species are numbered among the noxious weeds.

The Dominion Botanist is always pleased to hear from amateur botanists, especially those who are willing to send specimens that might add to the value of the herbarium. Many valuable contributions have already been made by correspondents throughout the Dominion, and other contributions will be gratefully acknowledged.

### Rail-Highway Truck

Wheels Are Combination Of Tires And Steel Flanged

A new rail-highway motor truck recently made a run from Akron to Cleveland over Baltimore & Ohio railroad tracks, turned off the rails at West Third Street, and proceeded to its destination. The truck has combination wheels which carry special truck tires beside steel flanged railway wheels. It is driven onto the rails at any crossing. The rubber tires are then deflated, so that the truck settles down with its steel wheels on the tracks. The front wheels are locked when the truck is on the tracks and the driver has no steering to do. When it arrives at its rail terminus, all four of the tires are inflated simultaneously from the engine by the same air-system that is used for brake operation.—Scientific American.

### Defining A Cannibal

A cannibal is one who loves his fellow man, says the Ottawa Journal. He also is one who gets around other human beings, adds the St. Thomas Times-Journal. And according to the Chatham News, he is one who gets along well with people, because he can stomach anybody. But, states the Toronto Star, the plain fact is that a cannibal is a cheat; he's always taking other people in.

Courses in American history were not introduced in schools of many European countries until after the World War.

## WORLD HAPPENINGS BRIEFLY TOLD

This year railway air services will fly 1,000,000 miles on inland routes in Britain as compared with 600,000 miles in 1934.

The United States senate passed the \$2,348,000,000 deficiency bill carrying in its appropriations for next year's relief program.

Under a new treaty Ireland will ship meat, butter, horses, wool, hides and other products to Germany in exchange for manufactured goods.

J. E. L. Graham of Weyburn, Sask., student of University college, awarded the fourth year gold medal in political science, it was announced by University of Toronto officials.

Conservation of tin cans as part of the German nation's raw material resources has become obligatory with the navy, the supreme naval command decreed.

Successful experiments in the revival of children's hearts after death were reported by Dr. N. Ostrovsky, of the Moscow Medical Institute.

Sir Allen B. Aylesworth, Liberal member of the senate for North York, told the upper house if Canada were given the right to amend its own constitution confederation "would not last."

The Canadian Jewish congress resolved "to support all measures designed to intensify the boycott of German goods." The resolution was adopted at the final session of the third annual meeting.

The Union of Canadian Municipalities will meet in Vancouver August 19-20 instead of July 27-29 as previously planned so that the meeting will coincide with the visit of Sir Percy Vincent, Lord Mayor of London.

## Vancouver Harbor Master

Perfecting Of Automobile Gave Commander Reed His Job

For more than a quarter of a century Commander A. H. Reed has been harbor-master of Vancouver, and oddly enough, was the perfecting of the automobile that landed Commander Reed in the position he has held for so long. He retired as ship's master in 1908 and came ashore with the intention of going into the horse-breeding business. "I didn't take him long, however, to discover what every landman already knew: that the day of the horse was passing. So he returned to the seafaring profession, did some marine surveying for the Dominion Government, and eventually was appointed port warden of Vancouver. Though well over 60 years of age, Commander Reed is still a clever amateur boxer.

## Will Be Well Represented

Prominent Canadians Going To Coronation Next Year

Canada, as in the case of previous coronations, will be well represented at Westminster when King Edward is crowned May 12, 1937. Prime Minister Mackenzie King and a large section of the Dominion party council will attend, as will probably opposition leader R. B. Bennett and many other leaders and members in the House of Commons and Senate.

The world's longest poem is said to be the great Hindu epic, "The Mahabharata." It was begun in 500 B.C. and finished about 1200 years later.

## Confidence In League

But Hertzog Thinks Versailles Treaty Should Be Overhauled

Prime Minister J. B. M. Hertzog at Cape Town termed the post-war Versailles treaty "the world's greatest source of friction" and declared failure of the League of Nations would lead to destruction of civilization.

General Hertzog, also minister for external affairs in the Union of South Africa, was speaking in the senate in a debate on the league.

He urged the necessity of revising the treaty, adding: "If war comes, this cursed treaty will be responsible." The debate was on a motion by Dr. Thomas Visser, vice-president of the senate, that activities of the league be limited to the interests of world peace and the application of pacific measures. Dr. Visser charged the league, as constituted at present, with "hypocrisy and subversion" to Great Britain, France and Soviet Russia.

Dr. D. F. Malan, leader of the National party, moved an amendment to Dr. Visser's motion, that the league should convene a world conference and should itself be revised in the light of its own experiences. He added that a plebiscite in any country in the world would result in a vote for peace.

General Hertzog expressed confidence the league would yet attain its high ideals. Its failure would lead to the destruction of civilization.

Concluding, Hertzog said no one could condemn Great Britain for the league because she was the one country which has done her best in this respect.

## Business Was Brisk

Operators On R.M.S. Queen Mary Had Plenty To Do

Radio, wireless and telephone communications handled aboard R.M.S. Queen Mary from the time of departure from Southampton until the arrival at New York, included more than 50,000 words of press despatches sent and received, constituted an unprecedented volume aboard a merchant liner.

Although 14 operators worked at one time for a period of 36 hours without sleep, it was impossible for them to keep up with the demand for service.

There were 1,177 radio messages sent, totalling 62,581 words, and 975 messages received, totalling 15,326 words. In addition, about 10,000 words were received from the Canadian Press and other sources for the ship's newspaper, "The Ocean Times."

There were 42 incoming Atlantic telephone calls completed for a total of 245 minutes and 52 outgoing calls for a total of 312 minutes.

The ship established a record for Atlantic telephone service, probably because she is equipped with a secrecy device preventing other persons from listening in.

The longest calls from the ship were to South Africa, approximately 8,000 miles. Also there were two separate calls simultaneously to London and New York. She sailed with stamps sufficient to meet what was expected to be an extraordinary demand. Before she was well out, the library was selling only small quantities at a time. She had 25,000 picture postcards aboard. All were gone by the end of the trip.

## Shatterproof Glasses

New Lenses Protect Eyes Of Workers And Children

Among the recent developments in spectacle lenses is the new English lens known as Motex. These lenses cannot be told from the ordinary lenses which shatter to fragments when broken. They can be ground to any strength either in white or colored, single vision or double. Besides correcting any optical defect, the same as any regular lenses, they have the added advantage of protecting the eyes from the danger of having the glasses broken on the face. This is particularly valuable in the case of children, and those engaged in work where there is a possibility of pieces of iron, steel or stone flying in the face. Those engaged in such sports as tennis, badminton, golf, etc., they are an absolute guarantee against injury to the eyes through breakage.

## Production Was Excessive

The League of Nations committee on suppression of drugs was told production of a certain narcotic (heroin) in Shanghai during 1934 exceeded between 12 and 14 times the legitimate requirements of the world.

Natives of some African tribes bear their bread in ant-hill ovens. Large holes are scooped out in towering ant-hills and a stone slab is used as a door.

## Airmen Are Honored

Recognition Of Achievements In Flight Across Antarctic

Honorary rank of air commodore has been conferred on H. Hollick-Kenyon, and that of honorary group captain on J. H. Lymburner. It was announced by Defence Minister Ian Mackenzie. These distinctions have been awarded in recognition of the achievement of the two recipients in connection with their aeroplane flight across the Antarctic continent.

These Canadian aviators, both of whom have had years of experience in Arctic flying in northern Canada, were selected by Sir Hubert Wilkins to act as pilots for the Lincoln Ellsworth trans-Antarctic expedition. Hollick-Kenyon was chosen for his special qualifications as an air navigator. Mr. Lymburner as an air engineer. Hollick-Kenyon acted as pilot on the flight halted in aviation circles as an achievement without parallel in the history of flying. Upon Mr. Lymburner's ability depended the airworthiness of the plane for this feat.

Hollick-Kenyon and Lymburner are British subjects of long residence in Canada. The former served as a pilot with the Canadian Expeditionary Force, and later with the Royal Air Force. He was wounded on active service.

The achievement of these two Canadian aviators was the fruit of unique experience gained in Canada. It is recognized as a pioneer exploit, equivalent in its day to those of Alcock and Brown, Lindbergh and Kingsford-Smith," said Mr. Mackenzie, in making the announcement.

"It is the desire of the Canadian government to express in this award of honorary rank the congratulations of the whole people of Canada to Hollick-Kenyon and Lymburner for the honor that they have brought to their country."

## Head Of League Society

Sir Robert Falconer Re-Elected President Of Canadian Group

Sir Robert Falconer, former president of the University of Toronto, was re-elected president of the League of Nations Society, the society announced in a communique released at the end of its convention in Ottawa.

John W. Dufoe, editor of the Winnipeg Free Press, was elected honorary vice-president, and Dr. W. E. Wallace, newly-named president of Queen's University, Kingston, Ont., was added to the list of active vice-presidents.

The communique said the society directed a special plea to form soldiers and members of the active defence forces to help in carrying out its program for peace.

## Going Into Business

Lloyd George Building Shop To Retail Farm Produce

David Lloyd George, remarkably successful as a model farmer, has announced he will enter the retail business. The war-time prime minister said he was having a roadside shop built near his estate at Churt, Surrey, which will stock fresh fruit, vegetables, flowers, eggs, honey and jam. It is hoped the produce will appeal especially to the passing stream of motorists.

Grenoble, France, recently had a rain of thousands of green frogs.

## Colorful Motif In Simple Stitchery

PATTERN 5528

What a refreshing rest for any bedroom—this spread with its daintily embroidered motif! The charming noke-bone Miss gives you a chance to adorn her hoop-skirt with gay, flower patches, cut from scraps, while her companion and garden come to life with only the merest working of French needle, outline and lazy-day stitch. You'll note there's a bolster motif to match—so do hurry, and you can enjoy this lovely needlework all summer.

In pattern 5528 you will find a transfer pattern of a motif 15 x 16 inches and a motif 4 x 10 inches; material requirements; illustrations of all stitches needed, color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 375 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## INVESTIGATED LEAKAGES

Mr. Justice Porter walking to the London Law Courts to preside at the judicial tribunal to enquire into the alleged leakage of Budget secrets. A number of prominent people took out insurance policies with Lloyds against increased taxation of tea and income tax prior to the reading of the Budget in the House of Commons.

## Luxury Travel In Russia

Soviet Boudoir Train Said To Be Marvel Of Convenience

A Soviet boudoir train which makes the luxury trains of other European countries look like stage-coaches was on an experimental run recently to Sochi, summer resort in the Crimea.

The least of its appointments is a barber shop—capitalist trains have those. It also carries a nursery car with toys, complete bath compartments, individual radios and a train crew dressed in the manner of hotel doormen.

Passengers may rent pyjamas and slippers aboard the train in order to travel in all the comfort of their own boudoirs. Each of the chairs can be separated from the others by curtains, providing perfect solitude for those who like it.

Women may obtain needles, thread, and yarn with which to while away the time, merely for the asking. A tailor shop is ready for business at all hours so no one need arrive at the end of the journey in wrinkled or soiled clothing.

The champion athlete in bed with a cold was told that he had a temperature. "How high is it, doctor?" he wanted to know. "A hundred and one." "What's the world's record?"

Airman (after landing in a tree): "I was trying to make a new record!" Farmer: "You did. You're the first man to climb down that tree before climbing up it."

## SUNDAY SCHOOL LESSON

JUNE 14

### JESUS CRUCIFIED

Golden text: God commendeth his own love toward us, in that, while we were yet sinners, Christ died for us. Romans 5:8. Lesson: Luke 23. Devotional Reading: Psalm 130.

### Explanations And Comments

The Crucifixion, Luke 23:33-38. On Golgotha, the place which is called the skull, outside the walls of Jerusalem, they crucified Jesus. On either side of him was hung a malefactor.

"Father, forgive them, for they know not what they do"—that is humanity at its greatest. Men have their conceptions of human nature, and of what things make for greatness therein. These conceptions are very many and very varied. I submit that humanity has never been seen greater than in the Man Jesus when he said this. In the soul of Jesus there was no resentment, no anger, no lurking desire for punishment upon the men who were maltreating him." (G. Campbell Morgan).

The people stood beholding, and the rulers scoffed at him, saying, He saved others; let him save himself, if this be the Christ of God, he chosen. This was their test of Messiahship. "It did not enter into their minds for a moment that the meaning of Messiahship was not the saving of others." And the soldiers also mocked him, saying, If thou art the King of the Jews, save thyself. This was their test of his kingship. They could not conceive of a king who would do nothing to save himself.

The people also asked him, saying, If thou art the King of the Jews, save thyself. He had replied, "Yes" (Thou shalt call him Jesus. He shall be great, and shall be called the son of David. But the Lord God shall give unto him the throne of his father David; and of his kingdom there shall be no end.

"In place of this supercription the eye of faith sees another, 'Behold, the Lamb of God that taketh away the sin of the world.'" (A. E. Garvie).

The Death of Jesus, Luke 23:44-46. Three hours of darkness and silence followed. Not only was the sun hidden but the curtain between Holies in the temple was torn in two. Jesus' self-committal. "Father, into thy hands I commend my spirit," and then his spirit passed on to God.

## A Remarkable Discovery

Enables Blind To Read From Ordinary Printed Page

Discovery of an apparatus which enables blind persons to "read" an ordinary printed page through a series of minute electrical shocks was announced by Emil Ranssen North-western University psychology student at Evanston, Ill.

The apparatus employs a photo-electric cell which converts light reflected from the printed page into the electrical energy necessary to produce the shocks.

The "reader" places his hand in a specially constructed wooden "glove". Across the palm of this is a series of nine beads. Through the holes in these beads project the ends of small coils of wire. Light reflected from the printed page and converted into electrical energy expands these wire coils in different order according to the shape of the particular letter. As the fingers of the hand develop this type of apparatus came from Helen Keller, famed teacher of the blind, Ranssen said.

## Once Did Flourishing Trade

Carver Of Meerschaum Pipes Is Dead In Vienna

Carving of meerschaum pipes, once a flourishing trade of which Vienna held a virtual monopoly, is dying.

Simon Schild, whose name was famous among the pipe smokers of the world for his artistic work, died there at the age of 68, almost in oblivion. Two other masters still survive, but none of them ever attained the fame of Schild, for whose pipes and cigar holders, decorated with artistically carved lions, dogs, or bearded philosophers, enormous prices were paid.

Allowing 30 years to a generation, an individual living to-day has over 500 ancestors from the year 1700 to the present.

A steering wheel which has no spokes in its upper part gives improved vision for the automobile driver.

It is said that blue-eyed people are more easily trained, and make better air pilots, than brown-eyed persons.

## Cameromans Dine In Style

Great Change Made In Barracks Of Second Battalion

For the 400 men of the second battalion, Cameromans (Scottish Rifles) at Quebec Barracks, Borden, "Come to the Cookhouse Door Boys" has now been translated into "Gentlemen, your meal is served."

Snow-white tablecloths cover neatly arranged tables, on which knives, forks, spoons and glasses, and even napkins, are laid out. Vases of flowers from barrack gardens complete the attractiveness.

Food is served up more invitingly and every menu offers alternative dishes.

Soldier waiters in white jackets—out on the lines of ship's stewards—hover round, replenishing water jugs and clearing away plates.

No longer is there a noise like an air raid; plates are taken away quietly on trolleys.

Men are allowed to wander in for their meals when they please, with in limits—and they wear any clothes they choose, provided they are clean, from "full parade" to "civies" and "fatigues."

Although the old Scottish custom of pipers walking round the room and playing at meal times has not yet been introduced as a final touch, there is discreet music from loud-speakers.

Major D. A. H. Graham, second in command of the battalion, who has had much to do with bringing about these changes, said:

"We believe this will result in a considerable saving over the old system of 'First come, first served' and 'Grab all you can, because you will not get any more.'"

## Science Set New Record

Wirephoto Gave Newspapers Quick Service On Auto Race

While grimy-faced speed aces were smashing records recently in the annual 500-mile auto race on Indianapolis' famous speedway, science, with a camera and a network of wires, was setting a record, too.

Just 16 minutes after the wave of a checkered flag signalled Lou Meyer's victory, an Associated Press picture of the race finish started moving over a portable wirephoto transmitter to newspapers from coast to coast.

Newspapers had any picture been transmitted by wire in such a short time after a camera recorded a news event.

While fans were still leaving the speedway, the picture was in newspaper offices on both the Atlantic and Pacific coasts, catching late afternoon papers in the west, and early morning editions in the east.

## Division Of Ethiopia

Creator Of New Roman Empire Names Divisions

All Ethiopia has been divided into five parts by Benito Mussolini, creator of the new Roman empire.

His cabinet approved a project by which each part becomes an administrative division. They are: Britania—capital, Asmara; Amhara—capital, Gondar; Galla and Sidamo—capital, Jimma; Harar—capital, Harar; Somali—capital, Mogadiscio. The cabinet announced each division represented a homogeneous organism "ethnically, geographically, historically, and politically."

Addis Ababa has been the capital for the new administrative organization of Ethiopia with a victory in charge, aided by a vice-governor-general and the chief of the general staff, the latter handling military matters.

Gas in the World War caused 181,053 known British casualties, which include more than 9,000 deaths.

Still when you see a car so old you feel it must be paid for.

## Crossfield and District Echoes

Mrs. H. Ballam was a Calgary visitor this week.

L. Johnson is home from Calgary for a short time.

Roland Amery and Dr. S. H. McClelland were business visitors to Calgary Tuesday.

Have you tried Mrs. A. McClelland's Canning Compound? Orders are now being taken.

Mrs. C. E. Rogers of Carstairs, was a visitor at the United Church Manse this week.

Mr. A. H. Templeton, of the Canadian Bank of Commerce at Olds, was a business visitor in town Tuesday.

Thinking of travelling this summer? The C.P.R. offers some fine travelling fares. See their ad and then get in touch with Agent Fleming.

Mrs. Ed Donald underwent a serious operation on Tuesday, at Calgary. Recent reports state she is doing as well as can be expected.

W. A. Hurt has installed a South Bend Lathe at his Machine shop so as to offer better service than ever. See him at his shop on Hammond Street.

Jean Stevens directs the readers attention to her ad in the Chronicle columns. Jean offers a speedy stenographic service, and teachers requiring copies of tests typed will find the rates very reasonable.

Planning a picnic or a children's party, yes, or a lawn party for grown-ups? Why not get a supply of the new Dixie Scottie Cups with serviettes to match. Ten cups and forty serviettes 35c—Chronicle Store.

Farmers are well advised to watch the advertisement of J. M. Larson, local Blacksmith, as in the very near future he will have something of interest to you all, about an added feature to his service.

Residents of the district are reminded that very soon the Bannister Electric are bringing to Crossfield the travelling model of the General Electric Perfect Kitchen, and it is brought to you through the courtesy of the local General Electric Dealers, Bannister Electric. Watch these columns for further details.

Miss Doris-Lay returned last Sunday after spending a holiday in Northern Alberta.

Mr. and Mrs. W. Sihvon of East Coulee are visiting with their daughter Mrs. L. Raisbeck.

Dr. E. S. Hoare of Edmonton, is attending to Dr. Whillan's practice while doc is on vacation.

Dr. S. H. McClelland is suffering from a dislocated shoulder, and has to carry his arm in a sling.

Will the party in the vicinity of Limit Avenue please refrain from his actions of attempting to poison cats. By so doing unpleasantness will be avoided.

F. Dewison of the Calgary Fire Department, was in town last week renewing old acquaintances. Mr. Dewison was a resident of Crossfield from 1904 to 1910.

It is expected that Mrs. W. H. McCool will undergo an operation at Calgary this week, for the removal of her tonsils. Her friends wish her a speedy recovery.

Miss Catherine Laut and Mesdames P. C. Griffiths, J. Belshaw, E. Fox, E. Longmire, T. Smeaton, and H. Ballam, also Messrs. E. Longmire and E. Fox, attended the Annual Assembly of the Ladies Aid of the Red Deer Presbytery at Bowden on Monday last.

Secretaries R. D. Sutherland and G. B. Hunter of the Municipalities of Rosebud and Beaver Dam, will attend the Municipal Secretaries Convention at Edmonton next week. They will be absent from their offices from June 16th to 19th.

Secretary T. Tredaway, expects to leave for Vancouver around July 1st and requests that all payments due the local Mutual Telephone Company be arranged for before that date so that everything can be cared for before his departure. Mr. Tredaway expects to be gone one month, so its imperative that rentals and tolls be brought up to date before July 1st. He bespeaks the co-operation of all members concerned.

As we go to press we learn that Mrs. W. H. McCool underwent her operation on Monday and is coming along as well as can be expected.

A New and Remarkable  
Remedy for Skin Disorders

## Bel-Zema

An original formula created by Wampole for the effective treatment of eczema and kindred skin disorders.

It is pleasant to use, being non-greasy and will not stain clothing. Is easily washed off with plain water.

## Midget Ball

East Crossfield met the Midgets last Thursday at the Crossfield Diamond, and the Locals just managed to sneak out ahead by the score of 16 to 15. It was an exciting finish. In the first half of the 7th the East Boys were on the wrong side of the slate to the tune of 14 to 3. But things happened, and though three pitchers went on the mound for Crossfield the East lads took them in their stride for 12 runs. The Midgets were one behind, but through clever strategy W. Hall laid a perfect hunt to score E. Hopper tying the score. Hall being out on his butt, Williams banged out on a two base hit, stealing third on an overthrow. Sharp up and snatched a single to right field, and was safe at first, scoring Williams.

In all fairness it should be stated that Manager Hall, thinking he had the game well in hand, in the 6th sent out three of the junior boys to give them a chance, pulling three of his stalwarts. This is not offered as an alibi, but just to show that anything can happen in a ball game.

It was an exciting game from the Fans point of view, and gave them their money worth.

## Box Score

East Crossfield 15 - 9 - 8

Midgets 3 - 2 - 10 - 6

Batteries: Trea, Laut, Wylie, Sharp, Fleming, Hopper, Hall and Fleming.

Come again lads and give us another good sporting game.

## Board of Trade

An extra special meeting of the Sports Committee is called for Friday evening at the Chronicle Office to discuss some special features that have arisen. To decide them it is necessary to have a full turn out. Messrs R. Sutherland, D. J. Hall, G. Ainscough, R. E. Greene, G. Murdoch, F. Stevens, T. Mair and L. Raisbeck please note.
